

Grades 6 to 8 Summer Math Activities

Dear Parents/Guardians,

St. Therese School has access to a web-based mathematics program called Math Street. One of the features of Math Street is that it web-based and can be used at home. **We encourage you to explore this website with your children during the summer months.** We're sure they will enjoy their learning experience.

The Math Street website address is <http://www.mathstreet.com/mathstreetschool>. (Please bookmark this website to make it easily accessible.)

School ID – 1037

Your Child's User Name –

Your Child's Password –

When they arrive at the program website, students will have access to:

Tutorials: Interactive “picture shows” that walk students through topics using real world examples. Tutorials are self-paced and students can select whether they would like narration or if they would like to read the words themselves.

Flash Cards: Addition, Subtraction, Multiplication, & Division with instant feedback provided.

Activities: Fun and relevant activities that can be enjoyed by the entire family.

Practice Quizzes: To prepare for upcoming tests. Quizzes are marked by the computer and instant feedback is provided.

Workbooks: Workbooks may be assigned by their teacher. Students will complete the workbook questions and submit them to their teacher for marking.

Please note: the program is hosted on a secure website and the only personal information entered into the program is their first and last name.

Have a great summer!

Sincerely,

Mrs. Bell, Mr. Picciafoco, and Mrs. Tomasic
